

# An exciting opportunity for a Scientist

Lhasa Limited is a successful not-for-profit company and educational charity, with an enviable reputation for collaborative scientific development. Our world-leading software and database systems are used globally in the pharmaceutical, cosmetics, chemical, agrochemical and other sectors for the prediction of toxicity, metabolism and degradation. Our continued success means that we are now seeking an additional Scientist to join our team in Leeds.

## Scientist (Full Time, Permanent)

From £30,000 + generous benefits including 34 holidays, generous pension, healthcare cash back and PMI

### What is the role?

We have an exciting opportunity for a full-time scientist to work in a talented science team developing a software program which predicts the potential degradation pathways of small molecule organic compounds. This program is used mainly by the pharmaceutical industry but is also utilised in other industries. Your job will involve collecting, curating, and analysing data to develop 'rules' that will be embedded in the software. As such, you will be at the forefront of the scientific development of this software and can determine its direction and growth.

### Who are we looking for?

We are looking for a highly motivated, conscientious scientist with excellent attention to detail and a keen problem-solving mind. You should also have a degree or equivalent in a relevant biological or chemical science. A PhD or Postdoctoral level or equivalent experience in a relevant biological or chemical science would also be advantageous. Other skills and attributes include:

- Knowledge of organic chemistry, in particular reaction mechanisms
- Experience in searching, retrieving, and curating scientific data
- The ability to identify and interpret structure-activity trends and formulate rules from complex chemical data
- The ability to work autonomously but also cohesively in a small team
- Excellent written and verbal communication, presentation, and organisational skills

### What do we offer?

You will be working alongside exceptionally talented colleagues. We support career development and provide the opportunity to collaborate with external users of our software to understand future wants and needs.

Our charitable status enables us to make altruistic decisions for the public benefit and to work with some of the leading organisations in the world to really make a difference including supporting medical research and greatly reducing animal testing.

We also offer fantastic personal benefits including (but not limited to!) a competitive salary, 34 days holiday plus bank holidays, a generous pension scheme, healthcare cashback, personal medical insurance and much more.
