

# Save with Lhasa Limited

## TIME

**90 days**

Avoiding the need to purchase impurities saves 90 days in the schedule

**90 days**

Avoiding the need to carry out an Ames test saves 90 days in the schedule

“ When using Derek and Sarah Nexus, the need for a GLP Ames test is reduced. Avoiding a GLP Ames test saves 90 days in the schedule and 12,000 – 15,000 BRL per compound. ”

Mariah Ultramari & Antonio Anax - Aché

## MONEY

**£40,000**

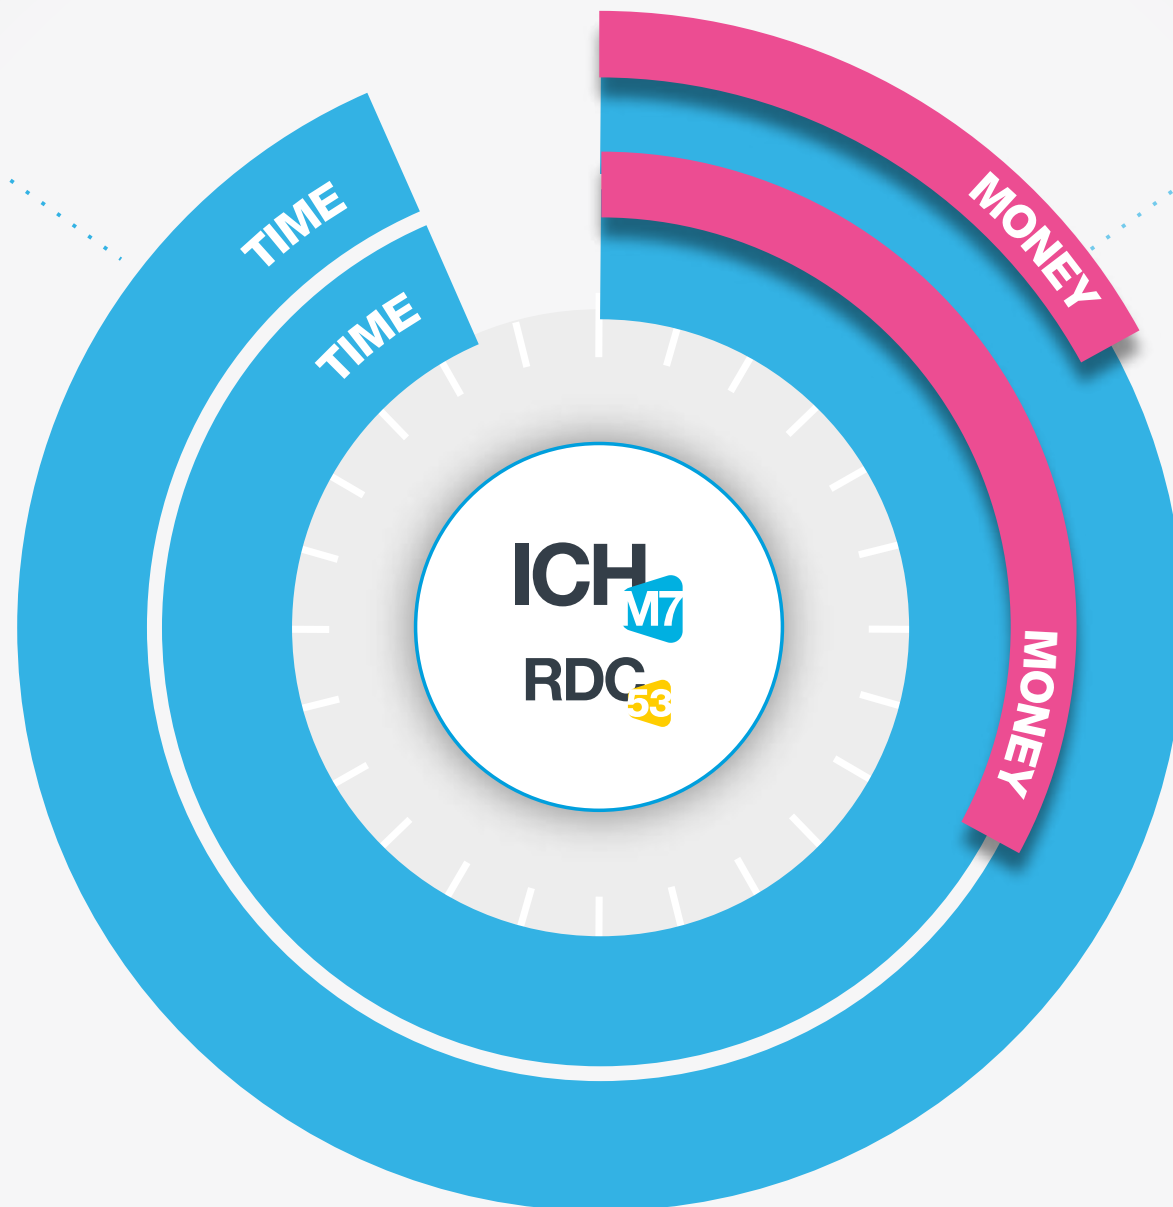

Saved each time the purchase of an impurity is avoided

**£2,000**

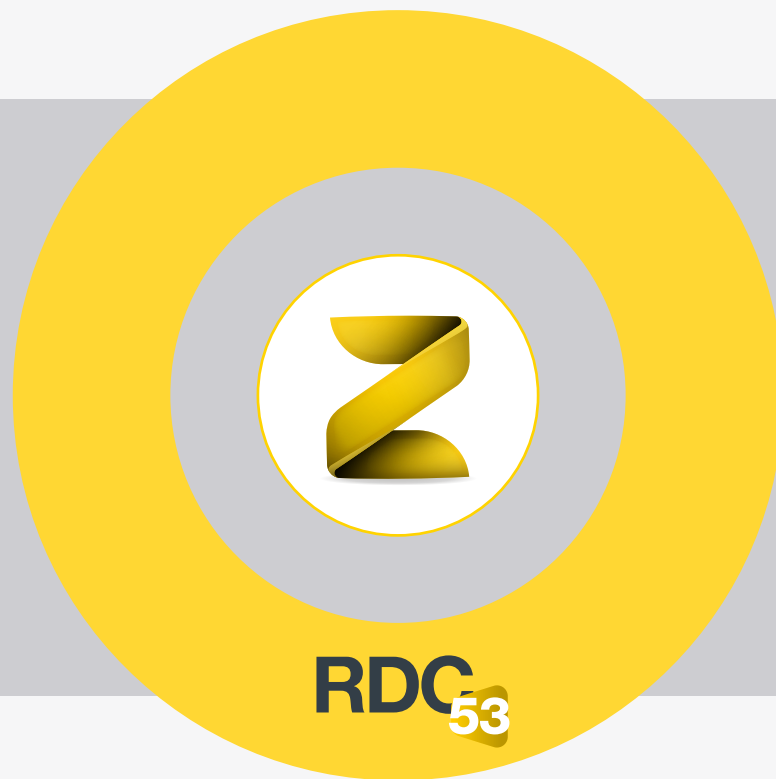

Saved per Ames test avoided

“ Further time and money is saved with impurity standard acquisition. Without Lhasa’s software, this normally takes an additional 90 days to be delivered at a cost of around 200,000BRL. ”

Mariah Ultramari & Antonio Anax - Aché

“By running a Zeneth prediction, we can focus on those degradants most relevant and make a more assertive decision.”

Overall we can assume that Zeneth saves us time during the degradant identification studies and money in impurity standards acquisition.”

Mariah Ultramari & Antonio Anax - Aché
