

Could purge calculations support your regulatory submissions?

A recent poll* found that 100% of companies surveyed are including purge calculations in their regulatory submissions with the majority of purge values accepted.

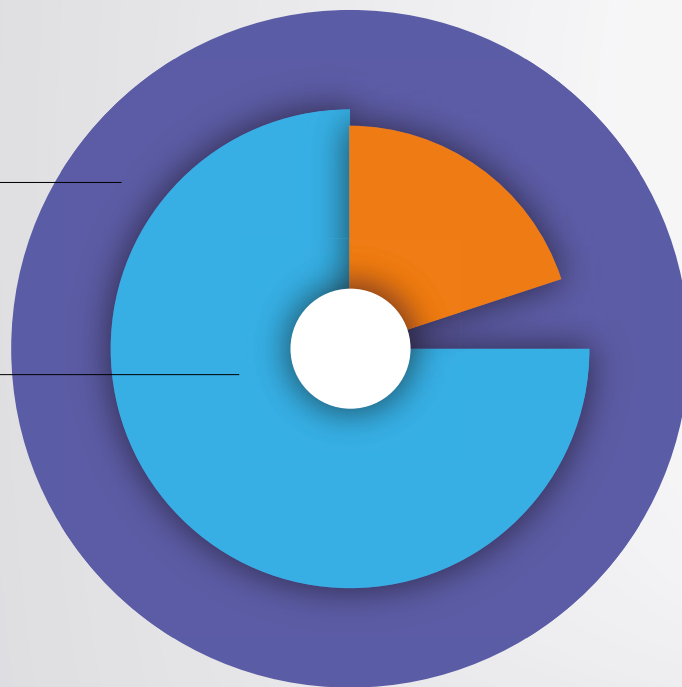

Are you using purge values in your regulatory submissions?

YES 100%

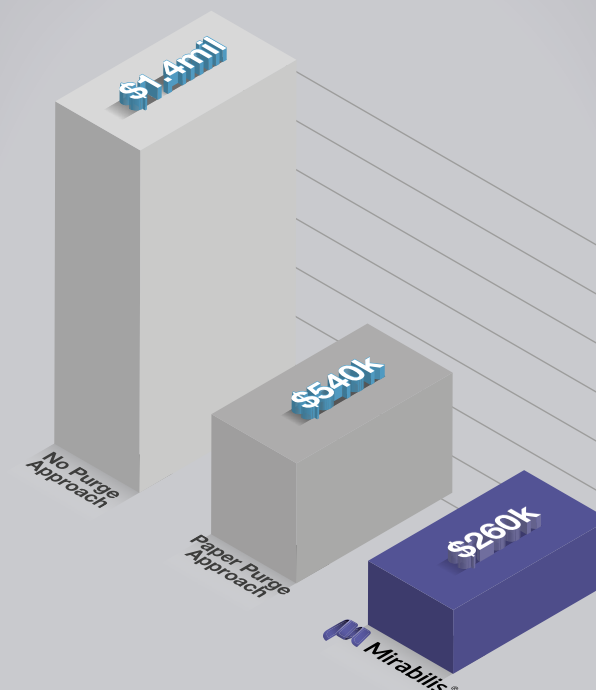

Have your purge values been accepted in regulatory submissions?

YES 75%

PARTIALLY 19%

**Poll conducted by Lhasa Limited during a recent teleconference. 16 participants took part in the poll.*

Are you using purge calculations in your regulatory submissions?

Using control option 4 (the paper-based purge calculation approach) with Mirabilis to control your potentially mutagenic impurities could save you time and money.

See our full **Mirabilis cost saving graphic** for more detail on this quantified estimate.
